# 3 Patio Covers In One

**The Sundance All Season Pergola is really 3 maintenance free patio covers in one:**

## **#1 A Solid Patio Cover**

When closed it protects your Deck or Patio, furnishings, appliances, and pets from the elements. The built in gutters drain the water where you want.

## **#2 An Adjustable Pergola**

As you adjust the louvers, they allow you to shade from any angle because they open up to 150°. While you get 100% shade you are also getting nearly 100% ventilation at the same time because the louvers are parallel to each other. To clean the louvers just open them completely and clean the top of the louver with a hose or medium power washer from below while standing underneath and out of the way of the water.

## **#3 Almost Invisible Pergola**

When open, the louvers allow almost 90% of the natural light to come into your patio windows and doors to give you amazing passive solar heat on cold days and keeping the interior rooms bright and beautiful when ever you want. Many customers say “It’s almost like having no patio cover at all”.

# Open for light and ventilation

# Close for shade and protection

# Blends to your homes architecture

# Custom designed to your needs
